OBJECTIVE

Highly motivated MERN Stack web developer seeking a challenging position to leverage my expertise in creating robust and scalable applications. Ready to contribute to a dynamic team and drive impactful results with my technical understanding.

SKILLS

Expertise: HTML | CSS | Bootstrap | Tailwind | JavaScript | ES6 | React | Query | MongoDB

Comfortable: Firebase | REST APIs | ExpressJS | JWT | C | MySQL

Familiar: Node | C++ | Java | Stripe | Python

Tools: VS Code | Git | Figma | Netlify | Vercel

PROJECTS

1. SportsZone Academy (offers various classes for students to enroll in) :

- The website supports multiple user roles such as admin, instructor, and student, each with their own set of permissions and capabilities.
- Students can browse the available classes and enroll themselves by paying the specified price.
- Instructors can add new classes to the website, providing details such as class name, instructor name, available seats, and price.

Technology Used: React | React Router | React Context API | Tailwind | Firebase | MongoDB

2.ToysStore (users can buy and sell toys online) :

- Users can create accounts, log in, and log out. Authentication ensures secure access to user-specific features and data.
- Users can browse and search for toys listed on the marketplace. They can view detailed information about each toy, including images, descriptions, and pricing.
- Authenticated users can add their own toys to sell. They can provide information such as the toy name, description, category, price, and upload images of the toy
